Expert

Back-end developer with experience in common third -party APIs and good knowledge of developing web services and relational databases.Familiar with web development and content management systems

WORK EXPERIENCE

Codenia Technologies LLP (May 20, 2024 - Present)
Developer

- Created RESTful APIs with Node.js to handle client requests.
- Collaborated with front-end developers to integrate server-side logic with user-facing elements.
- Assisted in developing user interface components with React

IBM (August 12, 2022 - October 24, 2022)
Full stack developer intern

- Collaborated within a team of interns at IBM as a Full Stack Intern. Focused primarily on backend development tasks.
- Utilized backend technologies such as Node.js, Express.js, and MySQL.
- Developed RESTful APIs to facilitate communication between frontend and backend systems.

PROJECTS

Group Chat App
This is a real-time group chat application enabling users to sign up and establish chats in groups.

- Designed the schema for chats, users, and groups and set up associations between them.
- Followed MVC(Model View Controller) pattern.
- Users can create and delete multiple groups.
- Implemented admin feature for the group user who can add and remove users. -Users can make other users admin and give them admin features.
